Input: 100-240 Vac 50/60Hz

CASAMBI

PLEASE READ THESE INSTRUCTIONS BEFORE INSTALLING THE PRODUCT
NOTE: CBU-CESRWZ is only compatible to work with Casambi enabled app.

This CBU-CESRWZ Lighting Control can be mounted directly onto solid ceilings or onto a range of different mounting boxes. Configurable for any room occupancy style, via the Casambi APP on Google Play or Apple APP Store.

INSTALLATION

To be installed by a competent person with reference to BS 7671 or equivalent local standards. If in doubt consult a qualified electrician.

- Plan where the CBU-CESRWZ is to be located (see diagram 1). Switch off supply and check for hidden cables and pipes.
- The CBU-CESRWZ should be connected as shown in diagrams 2 and 3:
  L Live in.
  N Neutral in.
  SL Switch Live.
- Knockout or drill the appropriate holes on the mounting plate for attaching the plate to the ceiling or back box (if applicable). Feed cables through the appropriate (side or rear) entry hole. Screw the back mounting plate to the ceiling or back box via the mounting holes. Wire the cables into the sensor head block terminal. Push the sensor head onto the mounting plate and align the side clips with the slots on the sensor heads.

OPERATION

To check the operation of the CBU-CESRWZ:

- Turn on the supply then after 20 seconds if the sensor has recognised movement of a person within its zone of detection the integral red LED on CBU-CESRWZ will stay illuminated for 4 seconds before the red LED turns off.
- Thereafter, every time movement is detected by CBU-CESRWZ the integral red LED will flash.

The control also features adjustable time out (time lag) control and daylight threshold control which are configured by the Casambi APP.

PRECAUTIONS

- Do not place the CBU-CESRWZ near heat sources, fans or in ventilated ceiling voids.
- Do not place close to, or positioned such that, any light source points directly into the CBU-CESRWZ.
- Ensure wires and cables are securely held within the connection terminals.
- The CBU-CESRWZ should be protected by a 10 Ampere mcb or fuse.
- **Disconnect the CBU-CESRWZ from the circuit before performing insulation testing of the wiring circuit.**
